

WECO IS CELEBRATING

# 30 YEARS OF INNOVATION

**Quality. Innovation. Experience.** WECO Electrical Connectors Inc. has remained dedicated to these core principals since its establishment in Canada in 1983. For 30 years our team has continued a tradition of innovation started more than 90 years ago in 1921 with the company's original founding in Germany.

Embedded in our corporate philosophy is our unwavering belief that the customer is king. Whether your requirements call for standard or custom-made solutions, quick-turn designs or special runs, our broad team of engineering, sales and service professionals strives to provide our customers with the connector solutions they need to succeed in their chosen markets.

## QUALITY

WECO merges revolutionary modern design and state-of-the-art engineering with best-in-class manufacturing processes. Combined with in-house UL and CSA laboratory certified testing, WECO is able to develop and introduce new products quickly and cost-efficiently.

## INNOVATION

Leveraging a portfolio of patented technologies, we have designed and produced connector solutions for companies of all sizes across the fire & security, LED lighting, industrial control & automation and HVAC industries.

## EXPERIENCE

Our global team of talented professionals offers a level of experience unmatched in the industry, ensuring our customers receive solutions tailored to their specific applications while driving down total cost-of-ownership levels.

*“ We must always guide our customers in choosing the most appropriate technology and product for their needs. Quality is more than a product or service; it is a responsibility and a process of change.”*

*Heiner Kammann  
President & CEO*

With a network of service and support professionals across the Americas, WECO goes beyond offering just a toll-free number, and brings service teams closer to our customers. We understand the complexity of connector solutions, and are committed to making the end-to-end process as seamless as possible -- from initial design, through manufacturing, to post-sale support.

Whether it's your first time looking for a connector solution or if your existing provider is not giving you the attention you deserve – give us a call. We'd appreciate the opportunity to introduce you to our company and solutions.
