

951-A-LFDS

Screw/solder terminal strip
Screw/solder tag connection

The screw/solder terminal strip 951-A-LFDS with a pitch of 5 mm is available in 2- to 12-pole design.

It requires only little mounting space and is well suited for low-voltage applications.

The solder tag is formed as a wire protector. The wire protection reliably prevents damage to multi-wire flexible conductors by the turning screw.

The moulding can also be mounted using the lateral flanges.
