Re: Statement on Compliance with Nanomaterials at WECO

Dear valued customer,

We recognize nanoparticles as solid particles with a size of less than 100 nanometers (nm). Nanotechnology is concerned with structures which are typically between 1 and 100 nm in size (source: Swiss Federal Office of Public Health).

Based on the information provided, WECO Electrical Connectors Inc. can attest to the best of their knowledge that no nanoparticles are manufactured, used, or formed through our processes.

WECO Electrical Connectors Inc. has consequently issued the following declaration:

1. We actively seek out information on the opportunities and risks inherent in nanomaterials and ensure that our knowledge reflects the latest findings.
2. No Nanomaterials are used in WECO Electrical Connectors Inc. products.
3. Our suppliers are obliged to inform us about the use of nanomaterial.
4. We openly communicate any information in relation to the use of nanomaterials in our products.

Sincerely,

A handwritten signature in blue ink, appearing to read "Noel Jesuratnam", written over a horizontal line.
